

# UNIT 1

## RECOGNIZING NUMBERS AND SHAPES

In this unit, you will:

- Learn to count from 1 to 10
- Be familiar with simple shapes
- Practice how to draw simple shapes

Look at the picture above. Do you know what the children are doing? Do you know how to count too? How many toys can you count in the picture? Can you name the shapes you see?

# Counting One, Two, and Three

Ken wants to count the chicks in their backyard. Help him count them.

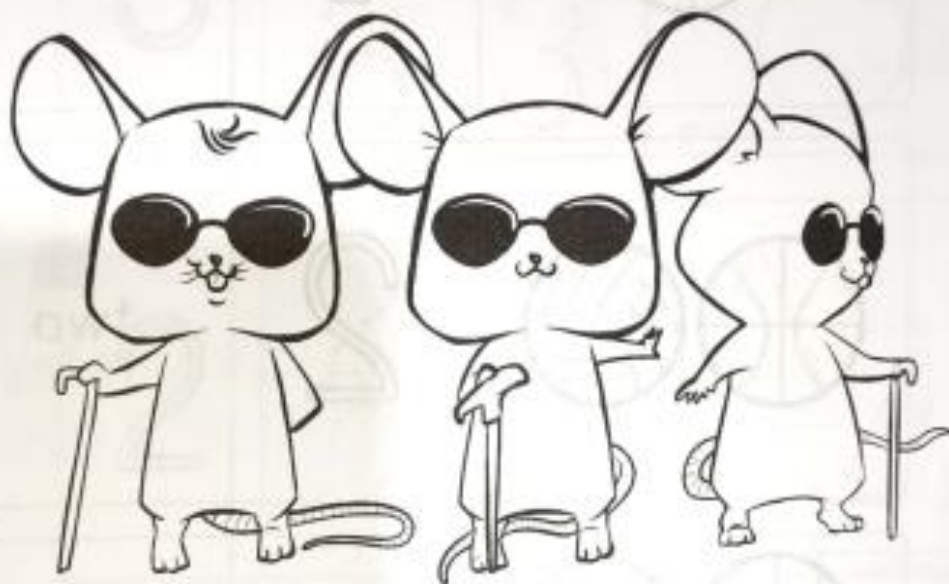

In this lesson, you will:

- Count the numbers one, two, and three
- Practice writing the numbers one, two, and three

### LET'S GET STARTED

Listen as your teacher teaches you the song,  
*Three Blind Mice*. Sing it with your classmates.

Three blind mice, three blind mice,  
See how they run, see how they run.  
They all ran after the farmer's wife,  
Who brought out a cat to chase them around.  
Did you ever see such a sight in your life,  
As three blind mice?

## LET'S LEARN

Listen as your teacher reads the following numbers. The numbers are **one**, **two**, and **three**.

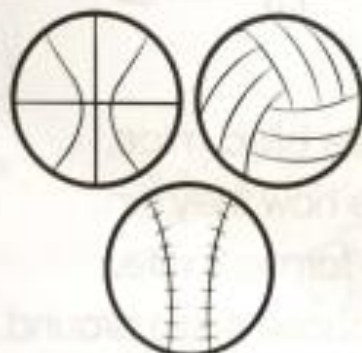

1

one

2

two

3

three

*To the teacher: You may use flash cards to show the numbers to pupils. Then, have them recite the numbers for constant recall.*
