

# UNIT 4

## LEARNING ABOUT GEOMETRY

In this unit, you will:

- Identify different geometric shapes
- Learn about object positions

Look at the picture above. Can you identify the shapes in the drawings? Do you know their names? What about the position of the toys? Can you name the position of the toys you can see?

# Recognizing Cylinders

Angela is in front of the dining table. She notices that some of the things on it have the same shape. Do you recognize the shape too?

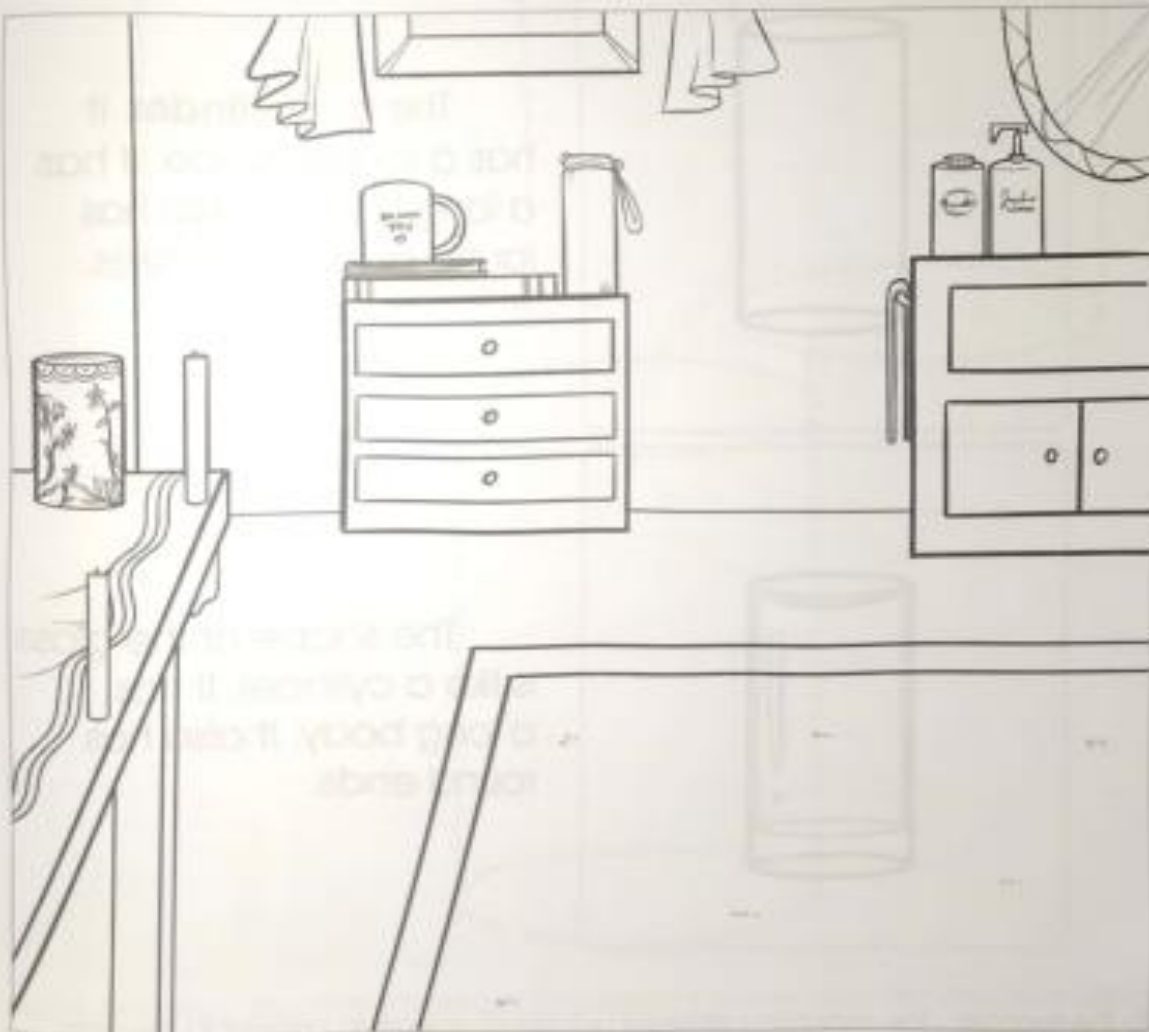

In this lesson, you will:

- Identify objects in your surroundings that have the same shape as a cylinder
- Trace the shape of a cylinder

### LET'S GET STARTED

Look at the picture below. Can you name the objects that have the same shape as a cylinder?

## LET'S LEARN

The things around you have different shapes. **Cylinder** is a shape you commonly see in your surroundings. There are a lot of objects in the environment that have the same shape as a cylinder.

This is a **cylinder**. It has a round shape. It has a long body. It also has round or curved bases.

The shape of the glass is like a cylinder. It has a long body. It also has round ends.

*To the teacher:* You may bring different cylindrical objects to present to the class. You should also describe that both ends of a cylinder form a circle.
